

## COMBINATION LOCK 2 WHEELS, KEY CHANGING

The lock is supplied with the following **INITIAL COMBINATION: 20 - 40**

Set your personal combination. You can choose among **12.000 POSSIBLE COMBINATIONS**.

**DON'T USE RED NUMBERS FOR YOUR SECOND NUMBER.**

To unlock "dial" the "set" combination by turning the dial (Fig.1).

### A) HOW TO DIAL THE COMBINATION

For example 20 - 40

- 1 - Starting from any number,  
**Turn right 2 times and continue up to the 1<sup>st</sup> number (20).**
- 2 - Starting from the 1<sup>st</sup> number (20),  
**Turn left 1 time and continue up to the 2<sup>nd</sup> number (40).**

### B) TO UNLOCK

Dial the combination (see point A), then **turn the dial slowly right hand until it stops.**

### C) TO LOCK

**Turn left hand at least 3 full revolutions** to break the combination completely.

### D) CHANGING TO A NEW COMBINATION (FIG.2).

This operation (**SETTING A NEW COMBINATION**) should be done with the door open and the combination locked.

- 1 - Dial the set combination (A).
- 2 - Insert the changing key in the key hole at the back of the door, in line with direction 1 (IN) (Fig.2). If the key does not enter freely up to a positive stop, the combination has been wrongly dialled. Redial the combination.
- 3 - **Turn the key from position 1 (IN) to position 2** (changing area).
- 4 - Accurately dial the **new** combination (A).

**ATTENTION! DO NOT USE THE RED NUMBERS FOR YOUR SECOND NUMBER.**

- 5 - Turn the key from position 2 to position 3 (OUT).
- 6 - Remove the key. The new combination is now set in the lock.
- 7 - **CAUTION! BEFORE CLOSING THE DOOR, TRY THE NEW COMBINATION SEVERAL TIMES (A-B-C).**

If an error has been made in setting a new combination, the lock cannot be unlocked and you should reset to zero (E).

### E) HOW TO SET TO ZERO (FIG.3).

This operation can be done only if, having opened the door, we don't know which is the set combination.

- 1 - Insert the key (Fig.3) into the hole at the back of the door and keep **lightly** pressed towards the inside of the lock.
- 2 - Turn right 3 times the dial till the key advances towards the inside (5 mm approx.).
- 3 - Turn left 2 times the dial till the key advances a second time.
- 4 - Remove the key and insert it from its other side (Fig.2; D, 2).
- 5 - Now set your chosen combination (D, 3.....7).
